

Consent to Release Data - A version of this waiver form has been used in the past for the Employee Insurance RFP and the RFP to replace CUFS. These large projects required that the University be able to disclose information to the University Community (AFSCME/TEAMSTERS, etc.) and to the Regents. The project needed the approval or support of these groups to be able to continue to be funded, but the evaluation/negotiations or vendor selection were not going to be completed from some time after the release of this data.

The form is to allow the University to disclose certain information from the responses without conflicting with the University's agreement to keep responses confidential until after an award.

Sample Wording

Consent to Release Data Prior to Award

Respondent acknowledges that section 4.1.4 in the RFP provides that the confidentiality of proposals shall be maintained until after an award has been made. The University as part of its approval process in this instance plans to release prior to an award, certain data and information obtained from the RFP responses. Accordingly, Respondent consents to the release of data and information from its response prior to an award. The intent of the release of this data and information is for the purpose of _____
